

# Come a Long Way

Simple Minds

Swing low, could be the last call for two of us  
I said, swing high, reach out and touch the sky  
But don't cry yet, it's not time yet

See this race is wrong  
Come see, this race is right  
See millions of years pass with no end in sight  
Sleep tight, you couldn't count the cost through the night  
'Cause it's not right, it never was right

Come a long, long  
Come a long, long way  
Come a long, long  
Come a long, long way

Come a long, long  
Come a long, long way  
Come a long, long  
Come a long, long way

Up on May day, there's a carnival on my street tonight  
I hear them dancing, I hear them dancing  
But on a clear day, if this thing don't move here  
Then this thing just don't have no heartbeat

Get on the street, I say  
Sweet hours to live, I got no time to kill  
I said, hold back those arms raised, hold back the bill  
Sleep tight, you couldn't count the cost through the night  
'Cause it's not right, it never was right, say

Come a long, long  
Come a long, long way  
Come a long, long  
Come a long, long way

Come a long, long  
Come a long, long way  
Come a long, long  
Come a long, long way

Swing low, could be the last call for two of us  
I said, swing high, reach out and touch the sky  
But don't cry yet, it's not time yet

Come a long, long  
Come a long, long way  
Come a long, long  
Come a long, long way

Come a long, long  
Come a long, long way
