

# Once Upon a Time

Simple Minds

And you  
Yes you speak to me tonight  
And you say so, say so  
That once upon a time  
When love, love was a white dove  
And hope, long live hope, could spin the whole world 'round

I'm talking east to west  
I'm talking lost and found  
Get up to the mountain top  
I'm going to drop unto the ground

That's once upon a time  
You raise me up when I know you're around  
But God only knows, what God only knows  
You lift me up and you spin me around  
God only knows, but God only knows

That's time  
Time looked around herself  
Time got excited  
That's when we all got started

Still I hear you, yes still you speak to me tonight  
You say then how come out of love, is all this cruelty arising?  
Well I said, look, well will you look at you, you're frightened  
I see that you smile through weariness  
But there is not much else enlightened  
Well, that's a question down to time

You life me up when I know you're around  
God only knows, God only knows  
Still you raise me up when I know you're around  
God only knows, God only knows  
That's time
