Sinamore

Walking on the edge all pain within  
Nothing matters to me now  
You are the one no one else to blame  
Nothing matters to me now  
Create a sound that's so divine I feel your pain

I follow you to the other side  
Nothing matters to me now  
I swept all away from yesterday  
Nothing matters to me now  
I wake the evil so divine - I feel your pain

My fallen dreams - I see your face in me  
My fallen dreams - I see

On your face I see now only fear  
All your life is now in disappear  
I wake the evil so divine - I feel your pain

My fallen dreams - I see your face in me  
My fallen dreams - I see your face in me

My fallen dreams - I see your face in me  
My fallen dreams - I see your face in me  
My fallen dreams - I see

All my life is now in disappear
