

# Salvation

Sinbreed

A call yells through the dark winter night  
A burning desire  
Just one step and your home is in sight  
A gently glowing fire  
With your smile the rising  
Sun's breaking through  
It's palming your face  
(Since) your return a golden light  
Surrounds you  
It lights up to the haze

What is your secret? What did you find outside?

Your eyes glow with a neoshine  
The exalted mien on your bright face is divine  
On your way you were searching for the lore  
Always tried to find the core  
From the sky to the abyss of the sea  
Beyond the sun you have tried to find the key  
Far away behind the frontiers of your mind  
You found salvation for mankind

Since a while fields of doubt are afloat  
Distrust and betrayal  
Now you walk on a long empty road  
They force you to fail  
You tried to enlighten our day  
A selfless redeemer  
We're not prepared to follow you on your way  
The way is our creator

What is your secret? What did you find outside?

Your eyes glow with a neoshine  
The exalted mien on your bright face is divine  
On your way you were searching for the lore  
Always tried to find the core  
From the sky to the abyss of the sea  
Beyond the sun you have tried to find the key  
Far away behind the frontiers of your mind  
You found salvation for mankind
