

I Can't

Sing It Loud

When you tell you how I think you'll never change
And just in case you don't believe me I'll elaborate
You're a dirty girl with a pretty face
You lay your heart on your sleeve so you can get away

I can't I can't keep myself from saying
I can't I can't keep on messing around
I can't I can't keep our love from saying
You picked me up just to pull me down
You picked me up just to pull me down

You know your the one who loves to get down get around
You don't have an honest bone in your body
So when you call me up, make sure to think about it
Cause your the only one who needs to leave

I can't I can't keep myself from saying
I can't I can't keep on messing around
I can't I can't keep our love from saying
You picked me up just to pull me down
You picked me up just to pull me down

I need some time alone
I've been dying just to come back
I have to get away
And find myself another day

I can't I can't keep myself from saying
I can't I can't keep on messing around
I can't I can't keep our love from saying
You picked me up just to pull me down
I can't I can't keep myself from saying
I can't I can't keep on messing around
I can't I can't keep our love from saying
You picked me up just to pull me down
You picked me up just to pull me down
