

Sugar Sweet

Sing It Loud

I've got a girl down in California
The golden sun brings her home to me
She laughs and she twirls, in her own little world
As the ocean waves crash around her body

She's sugar sweet
She's all that I need
It's taking all that I have to hold on
Her angel eyes
A clever disguise
I'm doing all that I can to move on

I've got a girl who swears that she is innocent
When the night is young she starts to make her move
But this feeling I get from the taste of her lips
Her head on my chest my hands are shaking
So make your move

She's sugar sweet
She's all that I need
It's taking all that I have to hold on
Her angel eyes
A clever disguise
I'm doing all that I can to move on

It's the way that she plays
With her sex appeal so I can feel
The way that she moves
So carefully it's killing me

She's sugar sweet
She's all that I need
It's taking all that I have to hold on
Her angel eyes
A clever disguise
I'm doing all that I can to move on
