

# Wonder Why

## Sing It Loud

You got an awkward set of dark brown eyes  
That are, telling me not to by  
A single word that creeps between your teeth tonight  
You know you got some nerve to test my will  
It's been givin' my back the chills  
And honestly I hope that you agree....with me

That we don't live forever  
No we won't  
But lets try to get better  
Yeah I hope  
You can pull this together  
Are you invincible  
You make me say

Woah!  
How I wonder why  
You let everything collide  
Don't try to hide today  
Does it ever really help anyway

Now you've been holding on for far to long  
And I don't wanna rub you wrong  
But who exactly do you think you are

Cus you've been playing games with peoples minds  
And I hope that it helps you pass the time  
Cus I'm the one that thinks you're blind  
So just pull it together  
Because you make me say

Woah!  
How I wonder why  
You let everything collide  
Don't try to hide today  
Does it ever really help anyway  
So forgive your enemies  
And never forget their names  
I hope you don't try to run away  
Because it never really helps anyway

Giving me your confidence  
Has started to cave in again  
The walls will fall  
Specifically as planned

If common sense is heating hear  
I don't think you'll be thinking clear  
Your eyes for me  
Are always looking up

Woah!  
How I wonder why  
You let everything collide  
Don't try to hide today  
Does it ever really help anyway  
So forgive your enemies

And never forget their names  
I hope you don't try to run away  
Because it never really helps anyway
