## See You Naked

Every night you turn off the light Well, do you mind? I can never see you naked To be polite you know I shot my mouth So I could ever see you naked

Be on the look-out for some uncovered parts You know How I would like to see you naked yeah To be polite you know I try to hide So I could ever see you naked I see

So maybe watch the news No wicked sign All alone with my excuse For being wild If ever what you want isn't there You're alone instead but you're feeling rare If wicked is what you knew No wicked sign No one's lying No one to denial

Is it your shame or your pride Your breasts or behind Why I could never see you naked Not too polite I know But do you mind? That I could ever see you naked

I'm sitting 'round the corner
Praying for my belief
I'll be watching
No, I should never cross the border
But it's on my cassette
I'll be looking

## Sioen
