Little Sister

Siouxsie and the Banshees

Here I sit in paradise my head between my hands

Little sister, break your vow break down, the sacred side little sister, break the rules break me in two

Little sister, now you're gone let's just say it's a mercy kill but little sister, you've left me howling at the moon

If you touched my heart you might be surprised you'd be paralysed

Will the free hand of captivity heal all of this brutality?

If you touched my heart
A truth might lie disguised
you'd be paralysed

If you touched my heart you might be surprised you'd be paralysed

just once, little sister just once ...
