

Easy Now

Sir Sly

Made a life and after you
Everything else disappeared
How the hell are you here
Since all these years passed?
Watched you drown from far away
Wished that I could take your place
I know a lot has changed

But the living's easy now
Now, easy now
Now, easy now

All my troubles, all my pain
All my pride and all my mistakes
Been washed away in years passed
Watch me fall from far away
Through the glass and then all went away
We both gotta be to date

But the living's easy now
Now, easy now
Now, easy now
Now

I know something that you don't know
I've been searching in all the world
I know something that you don't know
I've been searching out in the cold

What if I could clean your slate
Play the savior, take the blame?
We both got a lot of pain.

But the living's easy now
Now, easy now
Now, now, now.
