Angel Rays

The time we lost, you held your cross No tears did your eyes tell The time you lost, no matter what the cost Your strength it saw you through

But time will heal what your heart conceals And this I know too well The road you've known that takes you home Is waiting strong and true

For this child of mine She'll forever shine Angel rays Watch over you

But time will heal what your heart conceals And this I know too well The road you've known that takes you home Is waiting strong and true

For this child of mine She'll forever shine Angel rays Watch over you

For this child of mine She'll forever shine Angel rays Watch over you

Angel rays Angel rays Angel rays Angel rays Watch over you
