Green (Welcome to the World)

Sister Hazel

Welcome to the world, oh yeah A very unusual place Don't let that scare you Welcome to the world, oh yeah It's in your face It's all around you Well it can't go on and on forever So let it go And hold on tight It's all so new Yeah you're so green But I'll cover you So enjoy the view Yeah you're so green Until you balance on the earth to find that love Surrounds you Welcome to the world, oh yeah It's not your typical space Just let it hold you Welcome to the world, oh yeah Don't quit the race Let it unfold you Anywhere you go I'm gonna be one step behind you You may not know But I'll be there Welcome to the human race It's a very unusual place But that's what makes it wonderful Now your world has just begun You're a very unusual one And that's what makes you beautiful Well it can't go on and on and on forever So let it go It will go on and on and on forever When you go So hold on Hold on Welcome to the world oh yeah [Repeat]
