

# Meet Me in the Memory

Sister Hazel

Wasn't that something  
Wrapped in each other with our eyes on the clock  
And meant our some things  
Like this little thing that we've got

And as hard as it is  
When I'm thinking about you  
I wouldn't change a minute of it

When you're caught up in the hurt  
On the other side of the earth  
Just meet me in the memory  
When the waves hit you now and then  
You're awash in what we might have been  
Just meet me in the memory

So close to nothing  
What are the chances that we would collide  
And fate is the one thing  
The strongest of us can't fight

But I know a way  
When I'm drowning in the lonely  
I can almost taste you

We can never have it all  
So take the spring and leave the fall  
Right where it's crawling  
Separation is the scar  
Across the world to where you are  
It's on your heart never fades away

[Chorus]
