

# Black Planet

The Sisters of Mercy

In the western sky  
My kingdom come

So still, so dark all over Europe  
And I ride down the highway 101  
By the side of the ocean headed for sunset  
For the kingdom come

For the black  
Black planet  
Black  
Black world

Black  
Black planet  
Black  
Black world

Run around in the radiation  
Run around in the acid rain  
On a black  
Black planet

Black planet hanging over the highway  
Out of my mind's eye  
Out of the memory  
Black world out of my mind

So still, so dark all over Europe  
And the rainbow rises here  
In the western sky, the kill to show for  
At the end of the great white pier

I see a black  
Black planet  
Black  
Black world

Black  
Black planet  
Black  
Black world

And run around in the radiation  
Tune in, turn on  
You burn out  
In the acid rain

On a black  
Black planet  
Black  
Black world

Black  
Black planet  
Black  
Black world

Black  
Black planet  
Black  
Black world

Black  
Black planet  
Black  
Black world
