## Six Feet Under

You will die - no love there for you There's no guiding light to lead you through the night Only screams of torment, only fear and emptiness No life after the grave - only pain Lies - lies to live and die by Passed down through the years The truth? They'll never let you hear Only screams of torment, only fear and emptiness No life after the grave - only pain Pain - pain The disease of life continues Only the blind will follow And rot in the dirt Afraid to live - dead before you died Brainwashed - you live blind Brainwashed - they rot alive Brainwashed - preach your lies Brainwashed - I watch you die You will die - no love there for you There's no guiding light to lead you through the night Only screams of torment, only fear and emptiness No life after the grave - only pain Only screams of torment, only fear and emptiness You're the one who is lost - brainwashed
