

## Sick in the Head

Six Feet Under

i gotta fight my way out of hell,  
i gotta fight my way alone,  
i see myself dead by suicide,  
by a knife, gun, blade, or hang it high,  
will i be safe or will i die,  
can i stop the forces deep inside..my mind..my mind..my mind..m  
y mind..my fucking mind!!

dead to me..your dead to me..your dead to me..all dead to me..y  
our dead to me..all dead to me..your dead to me...oh my fucking  
god!!!

im a victum that lived through disaster, pushed to far, this is  
a reaction,  
i hate, your lies, i hate, my life,

dead to me..your dead to me..your dead to me..all dead to me..  
dead to me..your dead to me..dead to me..all dead...oh my fucki  
ng god!!

im a victum that lived through disater, pushed to far, this a r  
eaction to you..  
("to you "in the background)  
i hate, your lies, i hate , my life

i hope we all find a way, a way to live dead together, i way to  
hide my fears, a way to disapear,

i cant take it, i wont make it now, i just hate it, i cant take  
it, i wont make it now, i just hate it, i cant take it now, i ca  
nt take it, i cant take it, i cant take it, i wont make it now  
,

dead to me..your dead to me..your dead to me..all dead to me..y  
our dead to me..all dead to me..your dead to me..

death, death, your soon to be dead,  
i got a 12 gage under my chin,

death, death, your soon to be dead,  
i got a 12 gage under my chin,

dead to me..your dead to me..your dead to me..all dead to me..  
your dead to me.. all dead to me..your dead to me..all dead...o  
h my fucking god!!

im a victum that lived through disaster,  
pushed to far this a reaction..

died a thousand times again, in my mind i have died, i have slowly withered, i have slowly withered,

died a thousand times again, in my mind i have died, i have slowly withered, i have slowly withered,

died a thousand times again, in my mind i have died, i have slowly withered, i have slowly withered,

died a thousand times again, in my mind i have died, i have slowly withered, i have slowly withered.
