

Radio

Sixpence None The Richer

I remember all the roads together
That we drove on El Camino weather
When that song started playing again
We were singing to the wind

All the words they... so true
They were written for me and you
We had an anthem, we had a...
We were all that we ever need

But now the radio plays that song
I don't know if I can sing alone
I don't know if I can sing alone
And make it through

I remember when we drove so far
They were playing in the... bar
And you jumped up when they played that tune
They were singing it for me and you

I remember when we drove all night
You took me home in the morning light
You my anthem, you my...
You were all that I would ever need

And now the radio plays that song
I don't know if I can sing alone
Am I ever gonna make it through?
Am I ever gonna be with you?

Cause when the radio plays that song
I'm left alone with nowhere to go
Am I ever gonna make it through?
Am I ever gonna be with you?

And now the radio plays that song
I don't know if I can sing alone
Am I ever gonna make it through?
Am I ever gonna be with you?

Cause when the radio plays that song
I'm left alone with nowhere to go
Am I ever gonna make it through?
Am I ever gonna be with you?
