

Hyperventilate

Sixx:A.M.

It's your desire who to sing along
Do you run away or do you face it

Because your desire cause you harm
Doesn't want the devil twist your arm
Do you run away or do you face it?
Sometimes this love can be monotonous
Penetrates every heart and mind
Get it to your mouth but you can't taste it

Whoa oh, where do we go?
Whoa oh, where do we go?

The door is open, step inside, I'm frantic and alive
The oxygen is leaking from my lungs
Come save me if you can, I'd rather lay condemned
I'm hopelessly romantic and high strung
I just want you to know, these cracks are starting to show
Instead of breathing I'll just hyperventilate
And I'm freaking out in my head, just hanging on by a thread
Instead of breathing I'll just hyperventilate

It's like a bullet in your back
Grabs your heart and turns it black
Is it in your love or is it danger
You get so close that I can't think
You cut so deep that I can't heal
Am I like sleeping with a stranger

Whoa oh, where do we go?
Whoa oh, where do we go?

The door is open, step inside, I'm frantic and alive
The oxygen is leaking from my lungs
Come save me if you can, I'd rather lay condemned
I'm hopelessly romantic and high strung
I just want you to know, these cracks are starting to show
Instead of breathing I'll just hyperventilate
And I'm freaking out in my head, just hanging on by a thread
Instead of breathing I'll just hyperventilate
