

Miracle

Sixx:A.M.

You've got your father messing with your head
You've got your mother wishing you were dead
You've got your sister sleeping with your friends
Sometimes you wonder if it's ever gonna end

We need a miracle to kill the pain inside
Something so beautiful, it keeps us both alive
We need a little hope, tell everybody in the world tonight
We need a miracle, we need a miracle
We need a miracle, we need a miracle
We gonna leave it all behind like it's Saturday night

You've got the demons shooting down your dreams
They kill your confidence and self-esteem
Like little parasites inside your brain
Sometimes you wonder if it's ever gonna change

We need a miracle to kill the pain inside
Something so beautiful, it keeps us both alive
We need a little hope, tell everybody in the world tonight
We need a miracle, we need a miracle
We need a miracle, we need a miracle
We gonna leave it all behind like it's Saturday night
