## **Birth of Steel**

Out of the sunset the riders approach They come to defile our land We call to the druids to craft a new blade To rip through their iron and flesh

Let the voices of my brothers ring

Give me steel and the power to wield To make all my enemies kneel We will rise in the name of our king So behold the birth of my steel

With ;ron and carbon a union of might Melting with fires of hell The hammer is pounding the shape of the sword Forging the weapon of doom

Fate bestowed the paragon of blades

Give me steel and the power to wield To make all my enemies kneel We will rise in the name of our king So behold the birth of my steel

Give me steel and the power to wield To make all my enemies kneel We will rise in the name of our king So behold the birth of my steel

Give me steel and the power to wield They will die on the battlefield We will rise in the name of our king So behold the birth of my steel

Birth of Steel... Birth of Steel! Birth of Steel... Birth of Steel! Birth of Steel... Birth of Steel! Birth of Steel...
