## **American Noise**

Angry words and honking cars Satellites and falling stars Distant dark blue radios that whisper down my boulevards Ghosts and chains rattle in the attic Broken headphones filled with static Lonely room you've got nowhere to run

3, 2, 1 for all and all for 1

Times will be bad, times will be good Things I wish I hadn't done and some I wish I would Cutting through the American noise You've got a voice and a song to sing (and a song to sing) Drink deep in the morning Drink deep in the morning See what the day will bring

La da da da Lift up your voice Let love cut through the American noise La da da da Lift up your voice Let love cut through the American noise

Slamming doors and cell phone rings Hurricane force of silent screams Don't know what to believe Bend the rule just to break it You're so tired 'cause you're gotta fake it But you just wanna be someone

3, 2, 1 for all and all for 1

Times will be bad, times will be good Things I wish I hadn't done and some I wish I would Cutting through the American noise You've got a voice and a song to sing (and a song to sing) Drink deep in the morning Drink deep in the morning See what the day will bring

La da da da Lift up your voice Let love cut through the American noise La da da da Lift up your voice Let love cut through the American noise

No matter who you are you've got a voice Why don't you use it Sing your own song take all the noise And make it into music

La da da da La da da da La da da daaaa La da da da

## Skillet

La da da da La da da daaaaaaa

La da da lift up your voice Let love cut through the American noise La da da da you have a choice Let love cut through the American noise You've got a voice Let love cut through the American noise
