I testify, this is not a secret meant to keep  
Your love, like fire, spreading from my heart straight to my feet

And when I was dead, you gave me new life  
I'm lifting you up with all of my might  
I don't care who's to the left, to the right  
You're all that's on my mind  
Don't really care what they say, what they think  
I feel so alive

I'm unashamed, I'm wide awake  
Not gonna hide, can't deny you're my everything  
Here's to the free who still believe  
You're the star of the show that we came to see  
With all my heart, all my life, gonna live it loud  
I wanna make, make you famous  
Light up the night, let it shine, never burning out
