

Savior

Skillet

I'm everything you've wanted
I am the one who's haunting you
I am the eyes inside of you
Stare back at you

There's nothing left to lose
There's nothing left to prove
Surrender your love
It's all you can do, yeah

What you got
What you want
What you need
Gonna be your savior
Everything's gonna crash and break
But I know, yeah, I know
What you got
What you want
What you need
Gonna be your savior
Everything's gonna crash and break
Your savior

It's time to redefine
Your deophobic mind
Don't hesitate, no escape
From secrets on the inside

There's nothing left to lose
There's nothing left to prove
Surrender your love
It's all you can do, yeah

What you got
What you want
What you need
Gonna be your savior
Everything's gonna crash and break
But I know, yeah, I know
What you got
What you want
What you need
Gonna be your savior
Everything's gonna crash and break
Your savior

I am the eyes inside
Staring back at you
I am the eyes inside
Staring back at you

You need, you need me, yeah

What you got
What you need
Everything's gonna crash and break
What you got

What you need
Everything's gonna crash and break

What you got
What you want
What you need
Gonna be your savior
Everything's gonna crash and break
But I know, yeah, I know
What you got
What you want
What you need
Gonna be your savior
Everything's gonna crash and break
Your savior

You need me and I'm watching you
