

Come Get It

Skinlab

So come and get it, come and get it, take it from me
If you want it bad enough you'll try to find a way
So if you need it, gotta take, take it from me
I got it all, I got the cure for your disease.

So just forget it, just forget what they say
It doesn't matter, no it doesn't matter anyway
It's just another day just another fucked up day
Look in the mirror see the product of society.

One chance, one time to admit it
You can't resist because you're so goddamn addicted
The lights not so bright unless you abuse it
You can't admit that you're a goddamn loser of life.

I'm not crazy
It's just mixed emotions
And I gotta get 'em out of my head
I'm not crazy

It's just mixed emotions
And sometimes I think I'm better off dead.
So come and get it, come and get it, take it from me
If you want it bad enough you'll try to find a way

Just to get a... just to get another fix
I got it all, I got the high you can't resist
You don't get it, you just don't get it you see
You got your problems, yet you blame them on society

You don't get it, you just don't get it you see
You got your problems, but you can't blame society
Last chance last time to admit it
Got to admit that you're so goddamn addicted

The light ain't so bright unless you abuse it
You can't admit that you're a goddamn loser.
I'm not crazy
It's just mixed emotions

And I gotta get 'em out of my head
I'm not crazy
It's just mixed emotions
And sometimes I think I'm better off dead.
