

## From Sacrifice To Survival

Skinless

Beyond control, we are falling, out of control, there's nothing left

From sacrifice, to survival

The harvest is over, yet we are not saved

All have failed, its not what we've lost it's what we've made

Seasons change as do our perceptions

This cannot be our reflection

Diplomacy has been tried, it failed

Peace is nothing but a fairy tale

Bloodshed and war

The natural state of humanity

Peace is a dream that cannot be achieved, a lie, false sense of security

Grab your rifle and put down the signs

Hide your family and head for the front line

From sacrifice, to survival

It's the unfortunate but ever persistent state of affairs

The government and media market murder for a living

The worse things get the more profitable it becomes

Every drop of blood spills equals a significant financial gain

Discover and admit defeat to realize you are nothing but a change in ways

Life beyond needs, from sacrifice

The only thing we can hope for is survival

The only thing we can hope for, from sacrifice to survival
