

# Kings of the Universe

Skullview

Somewhere in a world of future time  
You can hear them crying as they die  
But the master pays no avail to them at all  
He is their god, he is their devil

He controls his spacecraft of fury hate  
Travelling the stars, crusching all  
For this is his world, a universe  
A man of black, master of fools

Kings, merciful ruler, kingdom above  
Kings, battle ensues, powers collide  
Kings

Kings of the universe, let the madness reign  
Kings of the universe, light the world in flames

Standing above the world  
All the gods join hands  
And the stars turn black and the sun burns out  
The black cloaked figure laughs  
Shooting past saturn and rolling through mars  
Mercenaries of a wicked hand  
So now you think you've got it all figured out  
Let the mercenaries take their final stand

Kings of the universe, let the madness reign  
Kings of the universe, light the world in flames

Breaking back to earth  
His laughter grows to tears  
And now he knows he's all alone  
He is dying to live

Nd the bodies of the fallen have risen above  
They cast him into flames  
And the wings of the future of mankind  
Are flying to him again
