

# Darkness Descending

Skyfire

Questions remain unanswered  
The will to prevail grows stronger  
To now know becomes a failure  
Proceeding with blindfolded eyes it seems

Impossible to break through  
Decisions made to shatter this heaven  
Reluctantly it's made so clear  
That it's never ment

To come in from another side  
To have a lock from another angle  
Showing the signs of a great disaster  
But who will master

The perception of life...  
Reduced the further we go

Witness another fall  
Indecision abundant  
Darkness descending  
A disease neverending  
Scars burnt unto our skin

Cover it all within  
Facing the facts in denial  
Lost to the creation of time  
As allegiance is sworn

The inconvenience (upon)  
Is taking its toll

Travel through excess  
An evocative ride between evident fears

Coming in from another side  
Having a lock from another angle  
Contemplating the great disaster  
That no one will master

The timeline has come to an end  
Replace and proceed

Witness another fall  
Indecision abundant  
Darkness descending  
A disease neverending  
Scars burnt unto our skin  
This is another fall  
Indecision abundant  
Darkness descending  
A disease neverending  
Scars are one with our skin

One with our skin
