

Cellar Door

Skylar Grey

Cellar door what's the use
Cellar door are you open to find me
Iron ore shields remorse
When i look, i look to your beautiful name
And find you're not the same

Cellar door what's the case
Are you locked in your shadow's embrace
Do you feel so insane
That you don't, you don't want to show me your face
But i, i can relate

Holding on, to everything, that makes us bleed

Overflowing underneath my pretty face
With the presence of the haste
Now they're sayin don't believe anything
But i do believe i know you

Cellar dooroligist
Your therapy is the one i love best
You give me strength to confess
That i, i will not last very long
So soon, i'll be gone

Oh these walls, know everything, and i'm tired of being lost in
side

Overflowing underneath my pretty face
With the presence of the haste
Now they're sayin don't believe anything
But i do believe i know you

Love will come to me and i will not remain
Hover over these confused contaminated veins
Love will come to me and i will not remain
Hover over these confused contaminated veins
Hey ya hey ya, hey ya hey ya
