## **Cellar Door**

**Skylar Grey** 

Cellar door what's the use Cellar door are you open to find me Iron ore shields remorse When i look, i look to your beautiful name And find you're not the same

Cellar door what's the case Are you locked in your shadow's embrace Do you feel so insane That you don't, you don't want to show me your face But i, i can relate

Holding on, to everything, that makes us bleed

Overflowing underneath my pretty face With the presence of the haste Now they're sayin don't believe anything But i do believe i know you

Cellar dooroligist Your therapy is the one i love best You give me strength to confess That i, i will not last very long So soon, i'll be gone

Oh these walls, know everything, and i'm tired of being lost in side

Overflowing underneath my pretty face With the presence of the haste Now they're sayin don't believe anything But i do believe i know you

Love will come to me and i will not remain Hover over these confused contaminated veins Love will come to me and i will not remain Hover over these confused contaminated veins Hey ya hey ya, hey ya hey ya
