

# Real World

Skylar Grey

Welcome back to the real world  
This ain't no virtual love  
Welcome back to the real world  
The kind of love you can touch

Welcome back to the real world  
Where I wanna be  
And I know it's really love  
My heart's on a screen that is broken  
It's really love when you hold me  
Oh I know the tension's for real  
As real as this strain we've been smoking  
So real, so warm, I breathe  
Breathe like I've never inhaled before

Welcome back to the real world  
This ain't no virtual love  
Welcome back to the real world  
The kind of love you can touch

Welcome back to the real me  
When we're all alone  
Oh I know it's really us  
No faces on a screen that is frozen  
It's really us  
So turn off the phone  
Cause I know the connection is real  
And I don't need a signal to show you

How I feel and more  
I bleed, bleed like I've never been hurt before

Welcome back to the real world  
This ain't no virtual love  
Welcome back to the real world  
The kind of love you can touch

In the still of the night  
Let the stars be the light

Welcome back to the real world  
This ain't no virtual love  
Welcome back to the real world  
The kind of love you can touch

Welcome back to the real world
