Hard & Fast

I don't want it Don't need anymore You got me lying on the killing floor tonight

I'm on eleven Been up for days

It's gonna bring me to an early grave This life So I've got to go You won't change my mind

Cause I can't survive Another night in the white room Cause a tiny bit It always turns to more

And these bloodshot eyes got to say goodbye I had my fun But I can't deny Living hard and fast I'll never last beside you

My skin is crawling I'm a shell of myself You come a roaring like a bat out of hell That's right Every fucking time

Well come on lover Won't you give it a rest I'm never gonna make it out of this mess alive

So I've got to go Got to say goodbye

Cause I can't survive Another night in the white room Cause a tiny bit It always turns to more

And these bloodshot eyes got to say goodbye I had my fun But I can't deny Living hard and fast I'll never last beside you

Cause I can't survive Another night in the white room Cause a tiny bit It always turns to more

And these bloodshot eyes got to say goodbye I had my fun But I can't deny Living hard and fast I'll never last beside you

Slash

Living hard and fast I'll never last beside you
