

Lyses from the street, stays on the wall
Secret plays me deep, be hide at all
Crisis from the heart, hit all the delta skin
Classic death just send lightning up to sky

Sorry, I don't remember
Anything about you (Anything about you)
Everything is gone now
And I set you free (I set you free)
Oh, whatta made that hum?
Just looking like a loser to me

I know it was you, who fell sleep first
There was nothing new, bring the silent peace
You know it was me
All talking, no action
I just wonder why you stayed with me

Sorry, I don't remember
Anything about you (Anything about you)
Everything is gone now
What am I gonna do? (What can I do?)
Oh, this time is counting me down
Baby, I gotta see it through

Some kind of gem at sky, but I was never losing my mind
(...losing my mind)
Whatever it took inside, I want to tie you to make you
mine

Sorry, I don't remember
Anything about you (Anything about you)
Bolt an open gun now
And nothing new (And nothing new)
Oh, I can't do this anymore
Lying to myself, I can let go
But I think about you (And I think about you)
Everything is ruined, got not to do (Not except rules)
Oh, I'm gonna let you know, you're the only one who
sang my song
