

## Soon

Sleeperstar

Everyone has somewhere to be these days  
Getting away from home they love to another place  
And if you have to go Let somebody else know  
So When you return I will come running

You say soon I will be with you  
And soon I will be there

Everyone has seen the end these days  
The television tells you half the truth through a beautiful face  
When you say goodbye leave some of your things behind  
As if to say you won't be gone so long this time

You say soon I will be with you  
You say soon I will be there  
You say soon I will be with you  
You say soon I will be there

You know you don't have to go right now  
Could stay tonight?  
Just stay tonight

Everyone is seeing the end these days  
They won't believe a thing that's not in front of their face
