

## It's Just Us Now

### Sleigh Bells

Starting line  
Now I'm really, really racing  
Stepping on throats, clipping the knees  
All that flesh and blood  
The real thing  
I can see the sun  
Going down so rapidly

Free of wreckage  
Down below licking streets  
I believe deeply  
In decency (indecenty)  
And when I'm conscious, I am cursed  
Shark teeth the size of pick-up trucks  
All that flesh and blood  
The real thing

And when you die  
I wanna die, I wanna die with you  
And lay us down for good  
And lay us down for good

Still torn down by a symphony  
I need something warm  
Like jet blast  
Cool breeze, cool G  
I'm having a hard time  
Remembering what's important to me  
A lifetime just waiting around  
For moments like these  
(A lifetime just waiting around)  
For moments like these  
(A lifetime waiting around)  
For moments like these

And when you die  
I wanna die, I wanna die with you  
And lay us down for good  
And lay us down for good

All that flesh and blood  
The real thing
