

## Sugarcane

## Sleigh Bells

So so sleeping on the ground tonight  
I couldn't breathe so I had two of these  
Sugarcane bounce the same when it touches the heat, when it touches t  
he heat

Hurricane always came when the season's complete  
I was late, why'd you step back? You were already there  
You could take from the lead but you don't even care

I've attempted but become so desperate to win  
We only talk about your damn charades  
I've attempted but become so desperate to win  
We only talk about your damn charades

The grass may be greener but you can't even smell  
How did the king included you?  
The grass may be greener but you can't even smell  
How did the king included you?

Beware, beware  
Beware, beware  
Beware, beware  
Beware...

Knock, knock, getting on your knees tonight  
Kicking the boys, you want me back  
But the dead was alive when I go to the beach  
How could I leave? How could I leave?

Hurricane always came when the season's complete  
Yellow hair over there, now I've got to compete  
With a bang on the hand and there's something in the air

I've attempted but become so desperate to win  
We only talk about your damn charades  
I've attempted but become so desperate to win  
We only talk about your damn charades

The grass may be greener but you can't even smell  
How did the king included you?  
The grass may be greener but you can't even smell  
How did the king included you?

Beware, beware  
Beware, beware  
Beware, beware  
Beware, beware
