

## Foreign Land

Slightly Stoopid

When ur rolling through the streets of the foreign land  
You never notice where u r but do the best that u can  
So the losers always lose and the winners win  
The one is gonna keep his head up high is the one u depend on  
And we ain't got to wait for her so long  
And we ain't got to right what once was wrong

And ur out there on the road and ur rollin through  
The places that u know u've been before, and the ones that are  
new  
And though you've seen a million lights, and the faces too  
And knowin you can find the one u want once the night is all th  
rough  
And we ain't got to wait for her so long  
And while were gone and we say u know it keeps us strong
