

# Wherein Lies Continue

Slipknot

Thou shalt not...  
Kill your fathers - destroy another life  
Question everything we clung to for years  
Live forever - design a better death  
Confuse a liar with a savior from fear  
Create a myth and separate the chosen ones  
Adolescent independence - Dominion  
I only wanna believe in fuckin' anything  
But now my conscience is contradicting everything

The ending's the same  
The world will not change  
The answer is clear...

Tell your mothers they have no sons or daughters  
Blame yourselves because your children are mine  
We are orphans, but we are not forgotten  
And we will find a way to save us this time  
We can run, but we are tired of running  
We're dropping seconds in a glass 'til we die  
We only wanna believe in fuckin' everything  
But we're alive and we're not accepting anything

The ending's the same  
The world will not change  
The answer is clear...  
Annihilation

I won't control or restrain things I do not understand  
Now I realize I'm stronger, better  
They gave to me now I give to you  
The means to burn the thoughts I had  
Now I realize I'm stronger, better, more

We have to save ourselves

I will never become another piece  
Inside the paralytic construct I hate  
Live forever? Well, I would rather die  
At least I'd know I wasn't theirs to create  
This is yours, but you had better choose  
Before they take away your right to decide  
I guess I'll never believe in fuckin' anything  
But my solace is I can handle everything

The ending's the same  
The world will not change  
The answer is clear...  
Obliteration

I won't control or restrain things  
I do not understand  
Now I realize I'm stronger better  
They gave to me now I give to you  
The means to burn the thoughts I had  
Now I realize I'm stronger, better

I won't control or restrain things I do not understand  
Now I realize I'm stronger better  
They gave to me now I give to you  
The means to burn the thoughts I had  
Now I realize I'm stronger, better, more

We have to save ourselves
