Listen To The Radio

Listen to the radio Where did everybody go? There's silence all around the globe I say it again Come on in

Voices in the static fade Riding out the echo waves Moving in and out of phase I say it again Come on back

It's on my hands I can't wash it away It's on my hands I can't wash it away

Listen to the radio Signal noise ratio The frequencies have all gone cold Leaving me here In the transmission swirl

No one's going to say my name No one's going to share the blame Nothing's going to grow again For the rest of my life In my new world

It's on my hands I can't wash it away It's on my hands I can't wash it away It's on my hands It's on my hands

Listen to the radio Where did everybody go? There's silence all around the globe I say it again Come on in Sloan
