

stop using me up  
you try to shatter me down now  
stop making no sense  
you try to teach me around now  
stop trying to be nice  
I don't believe in your show  
stop trying to be cute  
you're self-addicted and cold

stop sucking by billing what you're willing to do  
none of us will listen to what matters for you  
stop talking about your beautiful way of life all the  
time

stop trying to be good  
understanding and blessed now  
you better get yourself packed  
stand up and get dressed now  
stop knowing it all  
you're nerve-rackingly wise  
mister cosmopolite in a cosmic disguise

stop singing about the things that you have seen in LA  
never gonna listen to that talk anyway  
stop running on a teenie weenie kind of parade  
every little move on it is making me hate  
stop living this american way of life all the time

go leave us alone  
go leave us alone now  
leave us alone now

away  
get away

this is no holiday, baby  
this is no holiday, baby  
leave us alone
