

If You Don't

Smash Mouth

If you don't wanna be
Like all the rest of them
Like all my so called friends
Walk with me, stand by me
Take what you want from me
Get what you feel you need
If it means that much to you
Take it please

If you don't come if you don't go
If you think theres something I should know
You can come and share your misery with me
Yeah with me

Why don't you understand
That my hearts lying in your hands
You squeeze and bleed me dry
I try to live you want me to die
If it means that much to you
If you think theres something I should do
Take what you want from me
Get what you need take it please

If you don't come if you don't go
If you think theres something I should know
You can come and share your misery with me
Yeah with me

If you don't come if you don't go
If you think theres something I should know
You can come and share your misery with me
Yeah with me

If you don't come if you don't go
If you think theres something I should know
You can come and share your misery with me
Yeah with me
