## **Space Man**

## **Smash Mouth**

There you go around your tiny world again Playing space man in your silver ship You say you wanna come back down to earth again When you're down you find your mind and slip

There you go
Just like all the other times before

Lost in space You're lost in space

Antigravitation keeps you high above Like some comet speeding towards the sun Communication's lost between the ones who love you It's impossible to think that something loves you more than us

There you go
Just like all the other times before

Lost in space You're lost in space

There You go
Just like all the other times before

Lost in space You're lost in space
