

California's Lonely

Smile Empty Soul

Wait it's coming to me
I'm starting to see
So very clearly
Why I'm never happy
Cause California's lonely

California's lonely
California's lonely just like the rest of the world

I always feel sick
So hard to breathe in
My head is spinning
Rounded by the only
One that's always lonely

California's lonely
California's lonely just like the rest of the world
California's lonely just like the rest of the world
California's lonely just like the rest of the world

I'm so cold, in this heat
I'm so alone, in these crowded streets
There's no way I'm the only, one that's always lonely

California's lonely
California's lonely just like the rest of the world
California's lonely just like the rest of the world
California's lonely just like the rest of the world
