

## California's Lonely

Smile Empty Soul

Wait it's coming to me  
I'm starting to see  
So very clearly  
Why I'm never happy  
Cause California's lonely

California's lonely  
California's lonely just like the rest of the world

I always feel sick  
So hard to breathe in  
My head is spinning  
Rounded by the only  
One that's always lonely

California's lonely  
California's lonely just like the rest of the world  
California's lonely just like the rest of the world  
California's lonely just like the rest of the world

I'm so cold, in this heat  
I'm so alone, in these crowded streets  
There's no way I'm the only, one that's always lonely

California's lonely  
California's lonely just like the rest of the world  
California's lonely just like the rest of the world  
California's lonely just like the rest of the world
