

Chemicals

Smile Empty Soul

Every time I see your face
I'm leaving with a bitter taste my friend
And every time I hear your voice
You're leaving me with little choice my friend

But there ain't nothing left here for you to say, you shut your
mouth
I'm gonna put a bullet into your brain and shut you down
When there ain't nothing left here for you to say, I shut you o
ut
Another side effect of the chemicals I take

Every time you speak the truth
They wonder what they're gonna do with you
And every time you call a truce
I wonder if you're gonna follow through

But there ain't nothing left here for you to say, you shut your
mouth
I'm gonna put a bullet into your brain and shut you down
When there ain't nothing left here for you to say, I shut you o
ut
Another side effect of the chemicals I take

When there ain't nothing left here for you to say, you shut you
r mouth
I'm gonna put a bullet into your brain and shut you down
When there ain't nothing left here for you to say, I shut you o
ut
Another side effect of the chemicals I take

When there ain't nothing left here for you to say, you shut you
r mouth
I'm gonna put a bullet into your brain and shut you down
When there ain't nothing left here for you to say, I shut you o
ut
Another side effect of the chemicals I take
