

Hotel Room

Smoke Fairies

Late night hotel room
A thin rain falls through the gloom
I don't know where we are
I see five lanes of passing cars

Then something deep inside flickers on like a strip light
'Cause I've got a reason to glow
Got a reason to treat you like I love you

One blue shivering star
Neon shapes from the bar
On shining rain drenched streets
Got blue light beneath my feet

Then something deep inside flickers on like a strip light
'Cause I've got a reason to glow
Got a reason to treat you like I love you

You're like a light beam through my shaking skies
You're like a new day breaking up inside
You're like daylight to my waking eyes
You woke me up, you woke me up

'Till this moment fades
Electric blue turns to grey
I'll take all that I can
'Till the sparks fly through my hands

'Cause it's just a hotel room
And we're only human
But I've got something to prove
And a reason to treat you like I love you...

You're like a light beam through my shaking skies
You're like a new day breaking up inside
You're like daylight to my waking eyes
You woke me up, you woke me up...
