

Summer Fades

Smoke Fairies

As the summer fades to a watery light
And autumn's hues are coming to life
Can we start something new?
Just me and you
Through low light and trees
A future unseen is a future I can believe

Through the coldest months I held onto
A dying hope that flickered in you
And we'll start something new further than you
As death is to birth
The moon to the earth
Find a future I can believe

Can you hold me like you held someone you shouldn't have let go
?
Can you keep me deep inside like the regrets that burnt a hole?
Can you love me like you loved someone you loved so long ago?

Take me far away, a late night drive
See headlights flash in a stranger's eyes
And I'll start something new
Just me and you
Through low light and trees
A future unseen is a future I can believe

Can you hold me like you held someone you shouldn't have let go
?
Can you keep me deep inside like the regrets that burnt a hole?
Can you love me like you loved someone you loved so long ago?
