

Imagine there's no past, no future  
Look at yourself  
And don't believe it when they say you'll never die

Words don't only heal  
They can infuriate  
And make us interfere  
When we see injustice

Don't let anybody tell you what you need to be  
Just let go, but hold on until these feelings wash away

To begin to live for today  
You must imagine there's no past, no future  
Look at yourself

And don't believe it when they say you'll never die

Words don't only heal  
They can infuriate  
And make us interfere  
When we see injustice

Don't let anybody tell you that you've gone insane  
Go with what your gut tells you to do and never be  
Intimidated or manipulated by another's ways  
We're born into a crowded room just wondering where to stand

Our words are weaponry  
Our sawed off verses like a - shotgun blast (2x)

Words don't only heal  
They make us interfere  
And we'll scream them until the last breath leaves our lungs  
These songs we've sung have made us whole

Our words are weaponry  
Our sawed off verses like a - shotgun blast  
Our words are weaponry that aim for life, not death
