

# A Million Conversations

Smokie

We can try to understand  
It's something we should know  
A mother's dream is broken  
And she's got nowhere to go  
Do we know just what we're doing  
We're living in the past  
The hopes and dreams we're hiding  
Seem to hold on to the last

A million conversations never said a word  
Countless delegations saying things that won't be heard

Oh oh try to understand  
The children of the future  
Gotta have a chance  
Oh oh it's time to make it right  
There's gotta be a better way  
There's gotta be a better way

You'll fight a war for fame  
No-one takes the blame  
She sells her soul for water  
As they faced another plane  
We don't know what we're doing  
The innocent won't last  
Praying that their conscience makes  
Them recognize the past

A million conversations never said a word  
Countless delegations saying things that  
Won't be heard

Oh oh try to understand  
The children of the future  
Gotta have a chance  
Oh oh it's time to make it right  
There's gotta be a better way  
There's gotta be a better way
