

African Nights

Smokie

Over a land where the water flows
An eagle flies where the west wind blows
I saw her eyes shining crystal clear
One in a million years
And our hearts were one under burning suns
to the city of gold we will run

I still remember the African nights
Deep in my memory it burns me inside
I've thrown down my chains and
I'm ready to fight
Can we recapture the fire at the
African nights

From where I stand I can feel her touch
I'm in her hands and it means so much
I understand when the vision is gone
This feeling inside carries on
If the heart and mind reach a borderline
Who could consider it a crime

I still remember the African nights
Deep in my memory it burns me inside
I've thrown down my chains and
I'm ready to fight
Can we recapture the fire at the
African nights
