You; you are my life, you are my only possession and I will love you all my life Years, years ago, you were my only obsession and I have loved you all my life you flew to me like a bird on the wing When, when I was down you stayed with me through the bad times for that I will love you all my life We can say we are free we don't need any more, we don't need any more Now there is no more, nothing less than the good times and I will be with you all my life Moments of joy with some moments of silence And I'll give you guidance all my life We can say we are free We don't need any more, We don't need any more You, you are my life, you are my only possession And I will love you all my life
